

Sixth Grade Tweets

In preparation for this month's testing, we have been reviewing various grammar concepts, including conjunctions as well as revising and editing. We have also been writing argumentative essays.

The writing assignments will help them understand the process of writing an essay, using resources effectively without plagiarism. They will produce clear and coherent writing, and with guidance and support from peers and teachers, develop and strengthen writing as needed by planning, revising, editing, and rewriting.

ELA

Assalamu Aliykom

We are in the end of the school year. Alhamdulillah we were able to complete five Surah's during the school year (Al-Jumu'ah, A-Saff, Al-Munafiqun, Al-Hashr, and At-Taghabun). We were also able to cover most of the meanings and important keywords and tajweed rules. Students worked on projects, worksheets and tests to enforce the concepts. Students earned parties as rewards. They participated and did so well in the Qur'an Competition. Have a wonderful and safe summer break. Sis. Asma

Reading

We read the novel, "The Boy Who Harnessed the Wind". Students enjoyed reading this novel as it directly related to their STEAM project they have been working on this quarter.

Sis. Fatimah

Math

Alhumdulillah, we were able to complete all of our curriculum and the students also continued to work on their PBL STEAM Project. I wish everyone great summer but remember to practice whatever Math you can through IXL or any other resources because research shows that kids who stay completely disconnected from academics over the summer lose 6 months of academic skills and fall a grade level below.

Sis. Anam

SCIENCE

As we have launched out STEM project successfully Alhamdila, we were able to complete the project by studying more about biomes and ecosystems. As we will go in depth of the effects of pollution on an ecosystem, we must define them first. This chapter will not only teach us the different biomes, but also expand our knowledge on how each climate affect its plant and animal life. How do these animals adapt, and learn how animals react to pollution? This will conclude the last test for this year and Alhamdila we can all attest it was an amazing journey traveling the world of biology and chemistry.

As Salam Aleykum, Brother Sayel A.

M A T H

Alhumdulliah, we were able to complete all of our curriculum and the students also continued to work on their PBL STEAM project. I wish everyone a great summer but remember to practice whatever Math you can through IXL or any other resources because research shows that kids who stay completely disconnected from academics over the summer lose 6 months of academic skills and fall a grade below.

Sis Anam

Social Studies

The 6th grade students learned about the Economy. They learned how the economy works and how changes affect the system. We covered information about the different economies found in the world and how each is different from the other. Students also worked on their STEAM project in which they came up with a solution to the problem that was presented to them.

Sr. Nida

Arabic

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

Taking it to the next step to prepare students for a higher level of Arabic education, the end of year classes will be about the year-end project, where students prepare material from past lessons and choose several words to present to the rest of the class, completing the teaching experience for all the students to have a complete understanding of the content they learned this year.

Sr. Sawsan

Assalaamu'alaikum.

Alhamdulillah the school year has come to an end with great success shown by the students. Students have fully memorized Surah Saff, Surah Jumu'ah, Surah Munafiqoon and part of Surah Hashr. The students not only have memorized these Surahs but are also aware of the reasons as to why and when these Surahs were revealed and what are the stories behind these Surahs etc.

Br. Ahmed.

ART

ASA dear parents. Ramadan Mubarak. Alhamdulillah we had a great time preparing for the most blissful month of the year, Ramadan. Our students worked hard on creating greeting cards for families and friends, decorating lanterns, and overall investing creativity into their work. During art class, they also helped decorate our school to have a Ramadan theme. In addition, they also created cards for refugees as gifts.

Our students had so much fun on field day as they participated in various events.

It has been a pleasure to teach such wonderful and talented children. JAK.

Have a great summer.

Sis Heba

Islamic Studies

Assalaamu'alaikum.

Alhamdulillah, as we near the last week of school students have made lots of effort to reach this point and have learned a lot. Students have covered many different aspects of Islamic Studies ranging from Believing in the Unseen to the story of Musa (AS) taking valuable life lessons throughout their studies.

May Allah accept all of our efforts and the hard work that was put in by the students this year,

Ameen.

Br. Ahmed

Technology

Students were able to start on working on the basic foundation of Intro to Python lessons on the [codesters.com](https://www.codesters.com) platform. The students accounts will be active during the summer and I encourage the students to continue working on the lessons at their own pace during the summer break. Have wonderful and safe summer, Insha'Allah.
